

The Relief Cashier

Send Your Cashiers Home Early With The Relief Cashier Pay Station

Now you can determine the best time to send the cashier home. You will be back in control of your garage with this easy-to-use pay station, maintaining full revenue and lane monitoring activity.

This rugged paystation can be dropped right into your existing parking island and become the relief cashier for the night shift and other off-peak times.

The Relief Cashier, pay-in-lane station is clearly marked and easy-to-use. The parking customer merely inserts the ticket as indicated on the face of the machine. The rate is calculated (just as if the attendant inserted the ticket into the register). The amount due is displayed. When the customer pays, the ticket is retained in the machine and a signal is sent to vend the gate. The entire transactions captured on-line and in real-time. No lost data, all tickets are retained, and most importantly, there's no lost revenue.

A quick return on investment (ROI) calculation will justify the addition of this piece of equipment to your revenue control system.

As with all Secom lane equipment, high quality stainless steel construction means long life, high security and low maintenance. System can be ordered to accept bills, coins, credit or debit cards, and give change in coins and or bills.

With The Relief Cashier you can:

- ***Save on employment costs;***
- ***Keep the gates down 24/7;***
- ***Collect all your revenue;***
- ***Retain all your tickets for audit controls;***
- ***Use coupon tickets and on-line validations***
- ***Increase bottom line profits!***

The Relief Cashier can be used around the clock or merely for those off-peak times when it just doesn't pay to keep an attendant in the booth.

THE RELIEF CASHIER

Pay-In-Lane Equipment

Send Your Cashiers Home Early!

Applications:

- Mixed Use Retail & Office Locations

This paystation permits collection of funds within these garages, known for their peak and off-peak times. A review of the system activity will let you decide how late in the evening to burden the payroll.

- Small Garages and Surface Lots

A paystation is a natural winner in low volume and low turn-over locations where it is difficult to justify the costs of a cashier at all.

- Corporate Facilities

Validate your authorized visitors and charge all others a premium without incurring employment costs. Busy corporate campuses often provide free parking for unauthorized vehicles. Not with The Relief Cashier paystation - now you can charge these miscreants a premium to use your space.

Secom International builds, installs and services on-line, real time parking access and revenue control systems for clients worldwide. Unlike other parking revenue control companies, Secom's rigorous controls begin at Level Four and only get tougher. Secom offers machine readable ticket dispensers and fee calculating terminals, automated pay stations, express exits, automatic vehicle identification (AVI), access cards and readers, on-line validation systems, interactive lot capacity displays, with over 100 custom software choices, and PC driven DataView™ custom query and report generator. Integrated security controls, point-of-sale and access controls are also available. Contact Secom International to find-out how we can help you collect more of your parking revenue and consistently lower your overall costs of operations.

Secom: All Level Four Controls

System Requirements:

Hardware -

Controller must be either Secom's small application Secontroller 15 or the robust 030 Server System.

Software -

PSS-MR-25 Machine Readable Technology

Note -

Any Secom system equipment can be upgraded to the 030 Server System and necessary peripheral devices to support the Auto Cashier.

Any other brand of equipment will need to have the controller, and ticket dispensers changed to Secom to support Auto Cashier. Existing card system (contact factory for compatible systems), intercom system and gates may still be utilized.

How to Order:

Call your local factory representative, authorized dealer or the Secom corporate headquarters in Los Angeles at (310) 641-1290. A sales representative will assist you in determining costs and utility of The Relief Cashier paystation configuration for your specific facility.

Request your copy of Secom's complete revenue management tools, specifications and cut-sheets. Available now on CD-Rom.
