**SECOM INTERNATIONAL INC. ANNOUNCES:
VISA® VALIDATED PAYMENT APPLICATION CERTIFICATION**

- Netadmin Compliance Package v.1.0 -

-

LOS ANGELES: Parking Application & Revenue Control systems manufacturer Secom International, Inc., has announced it's certification as a *Visa Validated Payment Application*.

“Secom was founded on the principals of revenue control, user security and customer support.” said Ted Burton, co-founder and president of Secom International. “Obtaining Visa certification is just another commitment to our customers and clients.”

“While some manufactures rely on 3rd party compliance hardware, Secom has taken the extra steps to certify our entire system, not just one aspect of it.” said Terry Bixler, co-founder and Director of programming, while adding, “It speaks volumes about our product, our staff and our commitment to security.”

Joining a list of under ONLY 100 companies with certified payment applications, Secom cements itself as a leader in the global on-line card holder data security services.
